Diagram illustrating the structure of the input string "5" and its corresponding output string "5". The input string is divided into three segments, each containing a sequence of symbols. The output string is also divided into three segments, each containing a sequence of symbols. The symbols are connected by lines, indicating a mapping or transformation between the input and output segments.

The diagram illustrates a 32-bit bus system. It features four horizontal 8-bit data buses, each labeled with an 8-bit address (0, 1, 2, 3) on the left. The data buses are connected to a central 32-bit address bus, which is represented by a vertical line with a 32-bit address label on the left. The address bus is connected to the data buses via a series of 32-bit address lines, each labeled with an 8-bit address (0, 1, 2, 3) on the right. The address lines are connected to the data buses via a series of 32-bit address lines, each labeled with an 8-bit address (0, 1, 2, 3) on the right.

[illegible]
